am not certain; Horace Wheaton, the Mayor, was there; it might have been from half an hour to an hour from the time the shutters were put up till! I saw the men break in the north door, at this time did not go off on to the ground; when i went out it walked back of a part of the crowd, and did not go close to the building; the platform is ten feet wide;! Ithink! was out that time on the platform from a half a minute to two minutes; there was quite a number of people on the stoop, not full, however; when I went out of the half I went on the platform; cannot tell how near when I first saw them might have been two-thirds of the way from the steps to the window; I was southeast of them; I think I was about opposite to the south door when I saw these two men attack the door; the doors are about six feet argurt; they did not commence pounding till! got up to them; no blow had been struck. I should think they were in a hurry: I caught hold of the smallest man. The witness showed how the large man took him, and sent him out of the way! Can'ttell what became of the little man! think! Hornbeck struck the door, as I was pulled away; as I was thrown away, the men had their clubs raised; the big man was in the act of striking when I was pelled away; heard it! I went lack with the officer as seen as I could get there; when I got back into the police office, the ends of the sticks had begun to come through the windows—w good many sticks; after I got back into the office, this child was the time of the final breaking; think there was a crowd raished in when those two men marched to the back door; I did not see anybody enter the south door; dld not see anybody come in, the principal rash was at the time of the final breaking; think there was a crowd raished in when those two men is a the principal rash was at the north door; the two men were slice by side with clabs, and were the nearest to the small room; the when though the north door, till the plank was in the room; the two men was the own of the plank was in the room; the t

FOURTH DAY. AIBANY, Jan. 28, 1853.

The Court repeated the caution of yesterlay to the members of the panel not drawn, and after answering to their names, they left the court room in a body.

Cyrus P. Thompson called and sworn-Reside in Syracuse, know David S. Geer, hardware merchant; saw him and the night of the Jerry rescue; I was standing about three roots from the steps when I first saw Geer that even to g, we neve about in front of the hall door, or a little

south; we conversed—I spoke to him; have known him for twenty or twenty five years, since we were boys together; when the assault commenced on the office the crowd divided—a part went southeast, and a part pressed up to the other; Geer and I ran together, away; we went a little southeast, still farther from the police office; we were together till he was brought out, and went by us; after we moved away we were about six rods from the office, all about; the crowd was dense and thick; from where Geer and I stood I did not distinguish colors, white or black, on the steps, and don't think I could have done so; there was a great many people between us and the police effice window.

Cross-examined—Geer and I had been standing together five to ten minutes before the rusk; I was in conversation with him; at the time I was standing with Geer, there was no one clese standing near that I knew, think we did not hear any pistol fired till after we ran; did not remember of hearing any glass broke before we ran, nor that night did not distinguish the noise of breaking the glass at all, as I remember; did not see any stones thrown; heard noises against the windows as of clubs or stones; thought by the sound it was against the shutters; the assent was commenced before we run; heard these sounds before; don't know whether from clubs or stones; heard the sounds about a minute before we ran; don't know what we did run for; we run preity soon after they commenced the assault; don't know as we heard the shutters give way or cracking, before we ran; can't swear positively that the north window was not broken in before we ran; and opposite the hall; don't remember which side of Geer I was standing; think I was looking at the office when we run but don't know which window; saw the lights in the office after we ran; saw the light through the window stand were broken down—don't remember which window; think I could not see any light before we ran; I think we could not distingulah whether I were sound to severally only the propole were sta

lighted.

Joseph A. Allen—Resided in Syracuse; at the time of the rectue I boarded with the mother of the witness, Frances M. Greene, had conversation with her same day of the rescue in the hall; had considerable conversation with him, as he was the first person I saw that evening after the rescue; in the course of it I asked him if he could recognize any individual as engaged in the rescue; he told me that he could not, and that he did not believe it possible that any one could; he said that he had seen Marshal Allen since the rescue, and that Allen said the same thing—that he could not identify any one.

Cross-examined.—It might have been towards 90 clock; am not sure it was before; my impression is that it was before; I talked with him a long time; Greene's mother was present, his wife, and quite a number of boarders, including my wife; I found him in the hall; as I knew he was an officer. I asked him to describe the reacue; he said he was stationed with Jerry in the back room; that he was very much frightened; that he himself took Jerry and pushed him out to the crowd; that he thought they would all be killed; that Jerry was as much frightened as the rest; that he never was in such a scrape before, and never would be again; this is all of the conversation that I recollect.

Firect resumed.—What I have testified to is all I recollect, on the direct and cross.

Firect resumed — What I have testified to is all I recollect, on the direct and cross.

Cross-examined—I cannot recollect the order of the conversation—cannot locate the points of remembrance; in answer to my question, he said he could not possibly distinguish individuals there, and that he did not think it possible for any one to distinguish them; that he had seen Marshal Allen at the Syracuse House since the rescue, and he said the same thing; the reason why he could not was the firing of the pistols, and he was very much frightened; think James Davis was the first person I related it to; Davis lives in Syracuse; a week or two after the rescue; don't recollect at what place; I was not at the riot; I was returning from Thomas Davis's; was teaching music, and he had a music store; am a teacher of music now; sell some pianos; I mentioned my statement to Dr. Clary within six months after the rescue, and to Mr. Sedgwick, (counsel); to Sedgwick a month or so after the rescue; I knew he was one of the officers—one of the deputies; never had any conversation with Greene about it; made no memorandum of the conversation; I do not say I remember the words he used, but the substance; Greene was a good deal excited; there were none but women present, except Greene and myself.

Jarmain W. Loguen, called and sworn—Resides in Syracuse; was there on the night of the 1st of October, 1851.

Q.—Were you at the police office after Jerry was taken there?
Wheaton—I object. Greene testified that Loguen was

Wheaton—I object. Greene testified that Loguen was there: this is to contradict him. The Court—Who called it out? Sedgwick—The direct examination. The witness testified that Loguen stood by the side of Reed. The Court—I do not find it on my minutes on the direct. Mr. Sedgwick insisted that it was material evidence. We offer to show, by Loguen and two other witnesses,

We offer to show, by Loguen and two other witnesses, that Loguen was not in the police office that night, and to contradict Greene on that point.

The Court ruled it out. Overruled. Excepted to by

Henry W. Shattuck.—Was at the rescue; was police constable; saw Police Justice House and Enoch Reed together in the half, did not see them but once; I cannot locate the time precisely; don't now remember that I had seen Enoch before; it was after sundown, and before it was very dark; am not clear on the subject in regard to the precise time; could see him distinctly by gas light; Enoch had a small whin in his hand at the time. ight; Enoch had a small whip in his hand at the time; don't remember whether there was a lash on it; it was a leather whip, and the hundle was hanging down; I was on the steps when they broke in, a part of the time; had left when Jerry went away, to go to the watch house with a prisoner; went with Harrison Allen; was gone to the watch house four or five minutes, perhaps not so long; it would be impossible for me to tell—all guess work—how long before I went to the watch house; I saw knoch and House; I distinguished Reed in the hall, and spoke to him; House spoke to Reed; they were breaking the door, at about the time I went to the watch house; if had got to be dark then; Jerry was recened while I was gone; don't recollect what time it was; went back to the police office from the watch house; when I got back Jerry was gone; met the crowd as I was returning; from the bottom of the steps to the middle of the street is a rod and a half; opposite the hall door it may be two rods from the bottom of the steps to the middle of the street; at thirty feet from the bridge it would be about two rods to the middle of the street; there is an embankment made to go over the bridge; the bridge is twenty-eight feet wide, I should think; where the road strikes the bridge it is the same width as the bridge; the road widens as you go from the bridge; it was not a very dark night, and it was not a light night; don't recollect whether the chutter was down at the north window.

Cross examined—Fnech's whip was a carman's whip:

indow. Cross examined—Frech's whip was a carman's whip Friech was a carman; a carman's whip was shown wit-ness—he said the one Enoch had was much like it; could not say it was the one.

The testimony here closed, and the counsel for the defence commenced his speech.

The mail last night brought Galveston papers to to the 14th, and late dates from the interior of the State.

On the 24th ult., at Eagle Pass, a man by the name of Clark, belonging to the Boundary Commission, shot Tim Riley, belonging to company F., First Infantry. Clark then crossed into Mexico and shot another man by the name of James Sullivan. He was arrested on the Mexican authorities. Both Riley and Sullivan are reported dead.

During the last week or two, says the Ledger, we have heard of a number of Indian depredations, which are believed to be the work of the Lipans. We understand that a scouting party has been, or is about to be, sent in pursuit of these maranding parties. We hope these depredations will arouse the War Department to the necessity of a change of policy towards the Indians in Texas. The present policy has been tried sufficiently long enough to satisfy all that it will not give peace to our frontier. If the general government is really desirous of colonizing the Indians, so that they can be restrained and provided for, why is a proposition not made to Texas for a sufficient amount of territory for that purpose, before it is all located? The government agreed to protect our frontier. If this cannot be done without giving them a separate territory, where they can be guarded and provided for, why has Texas not been saked to grant, bargain, sell, or lease a portion of her territory for that purpose?

The Galveston Gazette understands that Major John A. Williams, chief engineer of the Harrisburg Rairoad, is now on an exploration of the Brazos bottom, for a point of location for crossing the river. He is accompanied by Mr. David Loring, contractor, and we are informed that they will reconnoitre the Colorado valley, as high up as Austin, preparatory to the company pushing forward this enterprise to the latter place.

late Presidential election as the overthrow or section-al legislation.

He then refers to the late State Convention, and to the constitution, which was the result of its la-bors. He recommends that the constitution be amended with respect to the representative basis, considering the principle of the negro basis contrary to the spirit of our institutions, and injurious to a large portion of the State.

He recommends the establishment of a system of Probate Courts, and suggests that much caution

that more banks must be had, he recommends that they be instituted on the free banking system.

The Governor represents the finances of the State as not being in a favorable condition. During the year, he says, the Treasurer has been unable to meet many just demands. The public works have, however, been prosecuted with success, as far as means were provided, and he recommends increased appropriations for this department.

He suggests that prompt action be taken on the subject of preventing overflows from the Mississippi, and states that the internal improvement fund will soon be exhausted. The common school system he represents as needing a thorough revision, and he thinks that the salary of the superintendent should be increased. He then refers to the asylums for the deaf, the dumb and the blind, which are located in temporary buildings.

Referring to the State library, the Governor says that the French and Spanish historical documents belonging to it ought to be published. He speaks of the present militia system as in a state of disorganization, and suggests that all proper encouragement be given for the formation of volunteer companies.

The message concludes with a few remarks concerning his retirement from office, etc.

COAL MINE ON FIRE.-The Broad Mountain COAL MINE ON FIRE.—The Broad Mountain vein, at Coal Castle, which took fire on the 13th of December, thirteen years since, still continues to pour forth its sulphurous gases, and in wet weather steam may be seen rising in volumes. For a distance of half a mile, this large vein has been entirely consumed above water-level—how far below is not known. It may be remembered that two miners lost their lives by suffocation in the attempt to quench the fire.—Harrisburg (Pa.) Union.

Stramen Istimus, which left San Francisco 15th Dee, for Panama, encountered on 16th heavy gales from SSE, accompanied by tremendons sea, which compelled the ship to bring to. At 4 P M on the 18th, a heavy sea seriously injured the radder, and for a time rendered the ship unmanageable; after severe exertions she was got before the wind, and the gale increased to a hurricane, but the ship behaved nobly. At 8 A M on the 19th, the gale somewhat abating, the radder was temporarily secured, and the ship brought to her course, but after striving for sometime against a fearful sea, it was found impossible to manage her with a temporary steering apparatus, and she was put about and air at 8 F 20th.
